Special Import Catalogue

SELECT STOCK FROM THE MOST RELIABLE GROWERS IN
BERMUDA, HOLLAND, FRANCE, GERMANY, JAPAN, CHINA
AND AMERICA.*****

Bermuda Easter Lily

PRICES ARE GUARANTEED. Many varieties are certain to be higher before date of delivery, while some may be lower. By ordering now the Florist is insured against a rise in price, and is guaranteed the benefit of a lower rate should such be quoted by us in our regular Bulb Catalogue.

The True Bermuda Easter Lily

(*Lilium Harrisii*)

Flowers from our bulbs are NOT shipped from Bermuda and offered in competition with those forced by the Florists of the United States. THIS WE GUARANTEE. See next page for prices, etc.

Headquarters ==

for Roman Hyacinths, Dutch Hyacinths, Tulips, Narcissus, Freesias, Callas, Lilies, Lily of the Valley, Spiraea.

TRUE BERMUDA EASTER LILY

(*Lilium Harrisii*)

(READY IN JULY AND AUGUST)

We Guarantee Our Bulbs fully up to measurement, and in perfect condition when delivered. **Do You Force Harrisii?** The following is worthy of your careful consideration: We further guarantee that no flowers have been cut from our *Lilium Harrisii* bulbs, and shipped to America, a course practiced by a majority of Bermuda growers, and which cannot be too bitterly opposed by the Florists of the United States. Please bear this in mind when comparing prices. It is not a question as to whether the bulbs are injured by this malpractice. *The growers who avoid this injustice to their American customers should receive the benefit of their orders.* If you would stop the practice, this is the quickest way to do it.

Prices are put in very low for true, healthy stock, for the benefit of early orders.

EARLY ROMAN HYACINTHS

(READY IN AUGUST)

Romans were scarce last year. The crop this season does not equal the demand. Such is the latest report of the leading French growers and exporters, and is further proved by the sudden advance in prices. It is most important that orders be placed early for these important bulbs. Prices will be found somewhat higher than last season, but are guaranteed. Our stock of Romans comes from the same growers, year after year, and has always given universal satisfaction.

DUTCH FORCING HYACINTHS MIXED

(READY IN SEPTEMBER)

From Choicest Named Varieties

Our Mixed Hyacinths for forcing must not be confounded with the cheap Mixed Hyacinth usually sent out as Hyacinths for Bedding. The bulbs here included are from the most select forcing varieties, which, under names, sell for a much higher price. Bulbs are **first size**, and fully matured. We recommend these mixtures as the most profitable to the Florist for forcing.

Bermuda Grown—Ready in August	\$4 50	\$40 00
China Grown—Ready in September	5 50	50 00

Per Mat of 120 Bulbs, \$6.25

Chinese Sacred Narcissus

LILY OF THE VALLEY

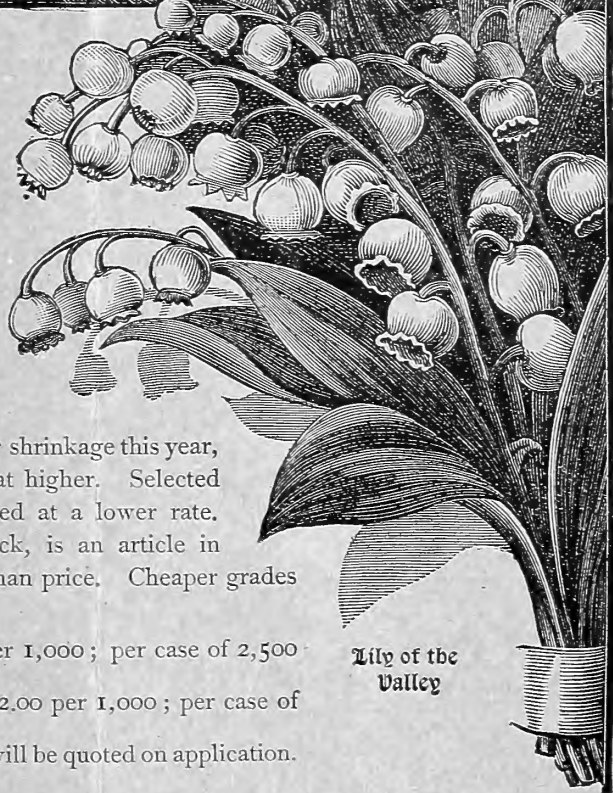

(READY IN NOVEMBER)

Our Lily of the Valley Pips, for forcing, are not known by any fancy name, but always have been and will be second to none in quality. They are grown in the best soil, adapted to their perfect development for forcing purposes, both early and late. The crop was one-third short last season, and present reports indicate a similar shrinkage this year, in consequence of which prices are somewhat higher. Selected quality Pips, similar to ours, cannot be offered at a lower rate. This, like all other important Florists' stock, is an article in which quality is of much more importance than price. Cheaper grades are offered, but we do not handle them.

Berlin Pips, for early forcing, \$12.00 per 1,000; per case of 2,500 Pips, \$26.00.

Hamburg Pips, best for late forcing, \$12.00 per 1,000; per case of 2,500 Pips, \$26.00.

For 25,000 lots and over, special prices will be quoted on application.

ERMISCH'S CATERPILLAR LIME

(RAUPEN LEIM)

Owl Trident Brand.

TRADE

MARK

WM. MENZEL & SON.

NEW YORK
SOLE AGENTS FOR

UNITED STATES & CANADA.

NOW is the Time

**To protect your FRUIT and SHADE
TREES against the ravages of Cater-
pillars, Borers, and other noxious in-
sects.**

The great ravages which are annually caused by numerous noxious insects, make it desirable to adopt some method to protect fruit and shade trees from these attacks, which will be at once effective, cheap, harmless and lasting, and thereby secure large crops of healthy fruit from the former and abundant foliage on the latter, and in this, as in many other cases, **an ounce of prevention is worth a pound of cure. Do not wait until the damage is done** to apply the remedy, but **apply it at once,**

The **only reliable, effective and perfectly harmless** remedy against many crawling and wandering insects on trees is

Ermisch's Caterpillar Lime. (Ermisch's Raupenleim.)

OWL TRIDENT BRAND, REGISTERED,

which has been approved and adopted by the Prussian Ministry of Agriculture, Forests and Domains, and numerous other foreign Government Boards, Forestry Departments and Horticulturists, as well as Authorities on Tree Culture in all parts of the United States.

A single trial will convince the most sceptical of the superior merits of the article as an **insecticide of the highest order.**

As a **remedy** against such pests as **borers** in peach, pear, cherry, apple, quince and other fruit and shade trees, fruit bark beetles, apple weevil or curculio on various fruit trees, also canker worms, codling moth, winter moth, gypsy moths, tussock moths, sawflies, bag worms, tent caterpillars, blood louse, tree louse, red spider, ants, aphids, scales, beetles of various kinds, pear psylla and numerous other insect pests **it stands unrivalled.**

Also to **prevent barking of trees** by horses, cattle, deer, rabbits, mice, etc.

DIRECTIONS FOR USING.

1. Against insects crawling up or down the trunks of trees, scrape off rough bark and apply the lime evenly to the trunk of the tree under the lowest limbs, or about four (4) feet from the ground, in a band **4 to 6** inches wide and at least $\frac{1}{4}$ inch thick, and **against Canker Worms,** apply a band a foot wide and $\frac{1}{2}$ inch thick. The insects cannot cross these bands and are caught on or under them in large numbers.

2. Against Borers thoroughly coat entire surface of trunk and lower branches of tree from ground up, where borers are in the habit of alighting, or laying their eggs.

The greatest range and most useful purpose that this material will serve is the protection it affords on trees of all kinds against the attacks of **borers.** For this purpose it should be applied **very thoroughly** at least $\frac{1}{4}$ of an inch thick to all the points that the borers are likely to attack, and if so applied it will **absolutely prevent the issuance of any of the insects then under the bark,** and it will also **prevent** as absolutely the **entrance of beetles** for the purpose of making galleries and laying eggs.

Properly applied it will **remain sticky and efficient** unaffected by temperature or rain for **three months** and longer.
